

Powder and Bulk Engineering *International*

Volume 10 Number 3
May 2017

***Mixing and blending: How grinding
can improve blend quality***

***Particle analysis: An introduction to
uniaxial shear testing***

On the cover: Rotary batch mixer is shown at Henry P. Thomson Inc. gently blending tea. Mixer continuously blends 726- to 1,180-kilogram batches every day. Mixer shown replaced an agitated ribbon blender that damaged the tea mixture. Mixer has no internal shaft with bearings or seals to contact material. Mixer fully discharges, eliminating waste and allowing rapid cleaning. Courtesy of Munson Machinery, Utica, NY USA, +1 315 797 0090 (www.munsonmachinery.com).

MAY 2017

PARTICLE ANALYSIS

12 An introduction to uniaxial shear testing

Tim Freeman

17 Equipment feature: Particle analysis

MIXING AND BLENDING

18 How grinding can improve your blend quality

Peter R. Holman

21 Equipment feature: Mixing and blending

GENERAL FEATURES

Cover 2 Ask an expert: Minimizing dust generation

Gary Q. Johnson

9 Pneumatic points to ponder: Using flexible hose for your pneumatic conveying system

Jack D. Hilbert

23 Featured trade shows: Solids Russia 2017 (Moscow, 6-7 June), FVG Select 2017 (Cologne, 13-14 June), EuroDrying 2017 (Liège, 19-21 June), CPhI China (Shanghai, 20-22 June)
